PROFESSIONAL SUMMARY

Final-year Computer Science student targeting data analyst roles with hands-on experience in Python, SQL, statistical analysis, and exploratory data analysis (EDA). Experienced in cleaning raw datasets, testing hypotheses, and creating clear visualizations using Pandas, NumPy, Matplotlib, and Seaborn. Completed an internship at Infolabz IT Services covering data analytics workflows, API data processing, and Power BI dashboards. Focused on solving practical business problems through data.

EDUCATION

Bachelor of Engineering in Computer Science Engineering

New L.J. Institute of Engineering & Technology (NLJIET), Ahmedabad (GTU) | CGPA: 7.5 / 10.0

TECHNICAL SKILLS

Programming & Querying: Python, SQL

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Power Query, Excel

Tools & Environments: Jupyter Notebook, PyCharm, Git & GitHub, API Data Processing, Streamlit

PRACTICAL EXPERIENCE

Data Analytics & Machine Learning Intern | Infolabz IT Services Pvt. Ltd., Ahmedabad

July 2026 - Present

- Performed data analysis and preprocessing using Pandas on API-sourced datasets; cleaned and structured raw records
- Built data visualizations in Matplotlib for exploratory analysis and created Power BI dashboards for business reporting
- Worked with elementary regression models and foundational machine learning concepts for data evaluation

PROJECTS & ANALYSIS

Uber Business Trips - Exploratory & Statistical Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Analyzed 1,156 Uber business trips and found 72.66% were under 10 miles, indicating strong short-distance concentration
- Identified Friday as the busiest day and 3 PM as peak demand hour, highlighting weekly demand cycles
- Calculated a correlation coefficient of 0.842 between trip distance and duration, validating distance as the main driver

Zomato Restaurant Performance Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Analyzed restaurant ratings, pricing tiers, customer votes, and online ordering adoption across categories
- Found Dining recorded highest customer engagement (20,363 votes), followed by Other, Cafes, and Buffets

E-Commerce Sales Performance Dashboard | Power BI, Power Query, Data Modeling

- Built interactive Power BI dashboard tracking revenue, order volume, and category trends over time
- Implemented drill-down slicers enabling quick filtering across product categories and temporal periods

CERTIFICATIONS & TRAINING

- AI Fluency: Framework & Foundations - Anthropic
- AI Fluency for Students - Anthropic
- Data Analytics Job Simulation - Deloitte (Forage)
- Data Science: Python and SQL Bootcamp with Projects
